PROFILE

Full Stack Developer with 2+ years of hands-on experience designing, developing and implementing applications and solutions using various technologies and programming languages. Creative problem solver with demonstrated ability to work on multiple projects simultaneously. Strong ability to document and present changes in an efficient and timely manner. Experienced in working independently on projects. Highly disciplined and motivated in developing high-quality applications. Excellent communication skills and enjoys working closely with others, seeking to leverage broad development experience and hands-on technical expertise in a challenging role as a Full-stack Developer.

TECHNICAL SKILLS

Languages: React.js, Node.js, TypeScript, NextJS, Javascript, Redux, HTML5, CSS.

Databases: PostgreSQL, MongoDB, MySQL.

Operating System: Linux, Windows.

Version control: Github, GitLab.

Development and Operations: NX mono repo, VS code, Docker, CI/CD, Jest, React testing library, Postman, SwaggerUI, Agile, Scrum, JIRA, Confluence, Storybook.

PROFESSIONAL EXPERIENCE

Developer 1

Applied systems Canada inc (Canada)

June'22 - Present

- Built reusable UI components and established design patterns to improve consistency and efficiency.
- Developed front-end components and pages for the new Ivans UI Environment using Next.js.
- Proficiency in writing tests with React Testing Library, ensuring the reliability and stability of the application.
- Built, Maintained and documented components in Storybook, creating a component library that can be easily shared across the team.
- Hands-on experience building analytics solutions, including data visualization and reporting, for carriers and MGAs.
- Proficiency in embedding Looker, a powerful BI tool, into web applications, providing users with a seamless data analysis experience.
- Involved in developing the Ivans UI Environment, a single point of access for all Ivans products, which simplifies and streamlines the customer experience and unifies the product line
- Developed APIs in Next.js for efficient data management and retrieval

Full Stack Developer

Biointelligence Technologies inc (Canada)

May'21 - May'22

- Created features for BioAnalyst in ReactJS and NodeJS.
- Maximized application efficiency, data quality, scope, operability, and flexibility.
- Found and Fixed numerous bugs across the stack in TypeScript & ReactJS/Redux.
- Create and execute unit tests using Jest and perform basic application testing.
- Architected and implemented RESTful APIs using Node.js.
- Wrote clean code, drove the technical design, and took responsibility for technical delivery.
- Documented 100% of the technical specifications and dependencies of the application.
- Sharing knowledge of tools and techniques with the broader team, both developers and non-developers.

EDUCATION

Post Graduate Diploma in Programming and Web Technologies

Institut Supérieur d'Informatique, Montréal

Feb'20 - Feb'22

Bachelor of Engineering in Computer Science

Sahyadri College of Engineering and Management, India

Aug'14 - Jul'18
